

HPE ProLiant DL380 Gen11 All Flash Node for Microsoft Azure Stack HCI Integrated System (P65984-B21)

What's new

- Microsoft Azure Stack HCI Integrated Systems based on HPE ProLiant DL380 Gen11 is available in AS HCI validated all-flash NVMe or SAS SSD configurations.
- Available integrated services for initial configuration of AS HCI cluster and network switches.
- Available specialized support for Azure Stack HCI based on Tech Care Essentials.

Overview

Are you struggling with transforming your Microsoft Hyper-V based virtualized infrastructure into a true hybrid environment to benefit from low latency on-premises workloads and the agility of cloud services alike?

Powered by a dedicated virtualization OS platform consumed as an Azure cloud service, refreshed annually and combined with the HPE ProLiant platform, HPE ProLiant for Microsoft Azure Stack HCI Integrated Systems offer the ease of an appliance-like

- Ongoing testing of Microsoft AS HCI OS and HPE driver updates offer peace of mind.
- Tight integration between on-premises AS HCI solution and Microsoft Azure public cloud services.
- Available AS HCI-specific cloud services such as Azure Kubernetes Services Hybrid or Azure Virtual Desktop on AS HCI running locally on AS HCI on-premises cluster.

solution experience. It provides the security and efficiency of the HPE ProLiant DL380 Gen11 server platform augmented by HPE deployment and configuration services, available AS HCI compliant Aruba and FlexFabric switches, and rolling testing of any OS and driver updates to confidently operate your important workloads.

HPE and Microsoft partner to provide a seamless experience from initial configuration and deployment to sure-footed management and offer the benefits of cloud services and integrated support experience.

Features

The HPE Hyperconverged Answer to a Hybrid Headache

HPE ProLiant for Microsoft Azure Stack HCI offers the ease of a pre-configured, appliance-like solution experience with the security and efficiency of the HPE ProLiant DL380 Gen11 augmented by HPE deployment and configuration services, available AS HCI compliant Aruba and Flex Fabric switches.

Before receiving OS patches and driver updates at solution runtime, Hewlett Packard Enterprise continually verifies the accuracy of the updates which significantly decreases your risk for an AS HCI workload interruption or service-level impact.

HPE ProLiant DL380 Gen11 All Flash Node for Microsoft Azure Stack HCI Integrated System

Built on the HPE ProLiant DL380 platform integrated with the Microsoft Azure Stack HCI virtualization platform, the HPE ProLiant for Microsoft Azure Stack HCI provides the assurances for a headache-free environment.

Services specific to Azure Stack HCI Integrated Systems are available for initial expert configuration as part of solution deployment, as well as expert support for AS HCI with support cases opened directly to the subject matter experts.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

The Defective Media Retention (DMR) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. Comprehensive Defective Material Retention (CDMR) allows you to keep all data retentive components.

HPE GreenLake

HPE GreenLake edge-to-cloud platform is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
